## About me

**I am a young developer looking to improve my skills, learn and add value wherever I go and with every opportunity I get. I have a passion for technology as well as using it to create new ways of doing things that can make everyone's lives just that much easier.**

## Work Experience

**Secure coding intern at Dimension Data/NTT**
**06/2019 – 08/2020**

- **My job was to learn about all the possible entry points cyber criminals can use to gain access to information or data and become a security champion from the ground up. Implementing security precautions from the code level and observing security specialists such as security sales people, consultants and engineers.**
- **Utilized various environments and tools such as Pycharm, VS and VS code, azure, AWS, Github and more.**
- **Practiced the Scrum/Agile methodology.**

**Senior Associate BI Developer at Dimension Data/NTT**
**09/2020 – 10/2023**

- **I was responsible for the hosting, maintaining and development of some .NetCore web applications.**
- **Handling calls and tickets from clients pertaining to their Bi reports and databases.**
- **Utilize various environments and tools such as SSMS, VS and VS code, azure, Github, MSRDP, PowerBI and more.**
- **Doing Data ingestion and ETL work for clients.**
- **Practiced the Scrum/Agile methodology.**
- **Developing Power Bi reports from the ground up.**
- **Doing data and report environment migrations.**

**BI Developer at NTT Data**
**11/2023– present**

- **Dimensional modeling for complex enterprise data warehouses.**
- **Developing robust ETL/ELT pipelines.**
- **Mentoring, coaching and knowledge sharing with my peers.**
- **Utilize various environments and tools such as SSMS, VS, VS code, Azure, Github, MSRDP, PowerBI and more.**
- **Practiced the Scrum/Agile methodology.**
- **Developing Power Bi reports from the ground up.**
- **Doing data and report environment migrations.**

## Skills

- Computer Literate – (Microsoft Office: Word, PowerPoint, Excel, Access) – Intermediate
- HTML – Intermediate
- CSS – Basic
- Git – Intermediate
- Python – Basic
- Javascript – Basic
- Django Framework – Basic
- Bootstrap 4 Framework – Basic
- Entity Framework Core – Basic
- T-SQL – Intermediate
- C# – Basic
- Power BI – Intermediate
- DAX – Intermediate
- SSAS – Basic
- SSIS – Intermediate
- SSRS – Basic
- Azure Data Factory – Intermediate

## Hobbies/Leisure

- Playing video games
- Volleyball
- Anime
- Tinkering with computers

## Strengths & weaknesses

- Focused
- Self-motivated
- Diligent
- Patient
- Ambitious
- Responsible
- Very technical
- Meticulous
- Introverted

## Projects & Events

- **Woodmackenzie** – Migrated Woodmac from a third party vendor to a self-service ecosystem by building infrastructure to support self-service file management, BI reporting, Active directory and providing support for post migration technical queries.
- **Rio Tinto** – Enabled the operational data vison of Kennecott, by addressing Data Store Data Architecture Gaps, Site ODW Data Architecture Gaps, Site Business Intelligence Data Architecture Gaps, ODS Application Architecture Gaps, Site ODW Architecture Gaps, Site BI Application Architecture Gaps, Technology Gaps.
- **Adcorp** – Providing support, maintenance, and development for Adcorp BI reports and databases.
- **NTT EIP 360** – Migrated data from a legacy Azure/SQL environment to a new one whilst making use of Views, Tables, Stored procs and SSAS packages.
- **British Airways** – Developed a Power BI report to ingest data feeding from their in house application to do near real time reporting on said data.
- **Nedbank Maslow** – Automated their regional billing reports from a manual Excel to Power Point report into a complete end to end ingestion to report solution, utilizing Azure fabric and Power BI.
- **PURCO SA/PURQ** – Developed a semantic model that ingests and cleanses data from their Sage system to produce financial reports and automated rebate letter generation.
- **NTT SPM** – Enhanced user reporting based on their feedback to include new data, pipelines, views, tables and reporting changes requested.
- **RCL to Rainbow** – Replicated and migrated all users within the RCL Foods tenant to their own newly established Rainbow Chicken tenant including all reports, data connections, Security and permissions.

## Training

- Microsoft Azure Online Training
- Whitehat Secure Developer Online Training
- Cybrary CEUS/CPES and training – CompTIA Security+
- LGIT Solutions Azure Fundamentals training
- SCRUM Training chaired by Nathan Van Den Berg and Ilzé van As
- Databricks Lakehouse
- Emotional intelligence and assertiveness – TLR Group

## Certifications

- WeThinkCode_ – Bootcamp completion
- AWS Cloud Practitioner Essentials (2nd Edition)
- Databricks – Lakehouse Fundamentals, Data Engineer Associate
- Microsoft Azure Fundamentals – AZ-900
- Microsoft Azure Fundamentals – DP-900
- HackerRank – SQL Intermediate
